## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. The following is an examiner's statement of reasons for allowance: Claims 1-8 are allowed because the prior art fail to teach or fairly suggest a semiconductor laser device as recited in the claim 1, especially with first impurity atoms of a second conductivity and second impurity atoms of the second conductivity exist mixedly in said active layer in the region near the end surface of the laser resonator, with concentration of said first impurity atoms being higher than that of the second impurity atoms.

Endo ('017) discloses the claimed invention a semiconductor laser as shown in Fig. 2 with the peak wavelength of photo luminescence in the active region near an end surface of a laser resonator being smaller than that of the active layer in an inner region of the laser resonator (col. 5, lines 13-24). However, Endo does not teach first and second impurity atoms exist mixedly in said active layer. In contrast, Endo discloses the thickness of the active in the near end region of the resonator being smaller than the inner region of the active layer.

Nomura et al. ('096) discloses the claimed invention as shown in Fig. 5 except for the active region being diffused with only one impurity atoms which is Zn, while the cladding layer being doped with two impurity atoms such as Mg and Zn, but not in the active region.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Citation of Pertinent References***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The patent to Endo discloses Quantum Well Semiconductor Laser, U.S. Patent No. 5524017

The patent to Nomura et al. discloses Nitride-Based... the Same, U.S. Patent No. 6928096
